To top: Apply Nail Art Glue Gel a little thicker on the buffed nail, then pour in and slightly press in the chosen decoration. Fill with a little bit of nail polish, add a little bit of the nail art and a little bit of the nail. Because of the larger glitter grains, there is a greater chance of chipping, so this technique is recommended for occasional use.

Built in gel&lac: Apply 2 coats of the same color as the chosen glitter to the nail, then after the second coat, Nail Art Glue Gel is applied to the nail surface and the glitter is sprinkled on. Fill in, sweep off the excess, then with a firmer substance e.g. Flexi Hard Gel, Mani Gel Clear, Mani Gel extra clear, cover the nail with a little C-curve, closing the edges! After filling, fix the nail, shape the surface with a file/buffer and cover with Extra Top, closing the edges!

Built in gel: 2 coats of the same color as the chosen decoration, then after the second coat, buff the nail, coat the surface with Nail Art Glue Gel and sprinkle the decoration. Apply the nail with a little C-curve using a transparent builder gel, close the edges and cover the nail with a little C-curve! After filing, fix the nail, shape the surface with a file/buffer and cover with Extra Top, closing the edges!

How to use: Apply top coat or Nail Art Glue Gel to the finished nail, over the entire surface or by drawing a pattern, sprinkle the glitter in it then set in the lamp for 1 minute. After lamping, sweep off any excess. Do not cover with top afterwards!

You can also use it as an built-in!

Sparkling finish: Apply 2 coats of gel or gel polish and sprinkle the chosen decoration on the second coat, then leave in the lamp for 1 minute. After lamping, sweep off the surface, then coat the nail with 2 coats of Extra Top. If the nail would be uneven with larger glitter particles, buff the surface after the light gel and cover with another coat of Extra Top.

Mermaid effect - gel-lac: After applying 2 coats of colour, use a thin layer of a transparent gel polish (e.g. Mani Gel Top), which sets to a sticky consistency, then press the chosen decorative ornament into the sticky layer after curing, then smooth the grains in a gentle circular motion.

Mermaid effect - for Brush&Go gel or non-cleansing colours: After applying 2 coats of colour, buff the surface, then apply a thin layer of a clear, sticky gel-lac (e.g. Mani Gel Top). From there, apply as described for the mermaid effect.

Candy effect: On the finished, glossed or matted nail surface, draw the pattern, using a colour similar to the glitter (so that the colour difference is not noticeable when worn). Before curing, apply one of the tiny glitters and cure for at least 1 minute. Brush off any excess glitter from the finished pattern. Do not cover with glitter afterwards!

Gel lac: 2 coats of the colour of your choice are applied to the nail, and after the second coat, glued the decorative elements with Nail Art Glue Gel. Cure them, then cover them with a firmer substance, e.g. Flexi Hard Gel, Mani Gel Clear, Mani Gel extra clear, with a little C-curve, closing the edges! After filing, fix the nail, shape the surface with a file/buffer and cover with Extra Top, closing the edges!

Should always be built-in because of their rigidity to make them durable for several weeks and so that they do not stick out of the nail surface.

In gel: Cover the nail in 2 coats with the colour of your choice, then buff the nail after the second coat and glue the decorative elements in place with Nail Art Glue Gel. Apply the nail with the transparent builder gel, cover the nail with a little C-curve, closing the edges.
